SUMMARY

Product Manager with 2+ years of experience building **AI-driven**, workflow-centric platforms for enterprise clients. Combining an engineering foundation (**B.Tech in ECE, VIT Vellore**) with **business** and **financial** intuition (**MBA, IIM Nagpur**), I specialize in process automation, platform scalability, and cross-functional execution. Proven track record of launching production systems, improving operational efficiency, and delivering reliable, user-centric solutions at scale.

EXPERIENCE

Product Manager

Planetcast Media Services Limited

📅 04/2025 - Present 📍 Bangalore, India

Cloud-based Media Asset Management (MAM) platform for global broadcasters and OTT platforms; clients include JioHotstar, Disney, NGC

- **Owned 0→1 development** of workflow-critical MAM capabilities for enterprise streaming clients, directly shaping how **3000 content assets/day** move through compliance review, QC, and publishing.
- **Built a live analytics dashboard** surfacing pipeline funnel bottlenecks in real time, **cutting operational decision time from 180 minutes to 30 minutes** – the same funnel-optimization instinct applied to a B2C flow.
- **Partnered with enterprise customers** to solve workflow and compliance bottlenecks through **configurable SaaS and enterprise product customizations**, improving platform fit for large-scale content operations.
- Owned a customer-facing workflow overhaul by translating **direct end-user friction into product requirements**, improving delivery reliability and reducing TAT by 10%.
- Expanded platform scalability to **support premium streaming formats (4K, HDR, Dolby Vision, Dolby Atmos)**, enabling enterprise customers to meet evolving OTT delivery requirements and **future-proof premium content workflows**.
- **Led cross-functional scrum product execution** across engineering teams, prioritizing roadmap trade-offs and **maintaining sprint velocity** to ensure timely delivery of customer-critical platform features.
- **Improved customer visibility into platform evolution** by **owning global release communication workflows**, ensuring clear adoption guidance and reducing ambiguity around product changes.
- **Scaled key product capabilities across mobile platforms** by partnering with Android and iOS teams, improving accessibility and user experience for on-the-go enterprise workflows.
- Influenced enterprise adoption by **leading product demonstrations and onboarding workshops**, translating customer pain points into actionable product feedback loops.

Jr Product Manager

Desynova

📅 01/2024 - 04/2025 📍 Bangalore, India

- Served as **Scrum Master**, demonstrating adaptability in **coordinating cross-functional engineering sprints** to deliver features on time while upholding **agile methodology** practices.
- **Collaborated on roadmap prioritization** by balancing customer needs, technical feasibility, and business objectives to improve product delivery outcomes
- Bridged product, marketing, and pre-sales teams to **ensure customer feedback informed product direction** and go-to-market readiness.
- **Discovered enterprise workflow customization needs** through **customer research**, informing the **launch of low-code configuration capabilities** that improved platform flexibility and **reduced dependency on engineering teams**.
- Independently **designed and ran an A/B test on a GenAI-powered subtitle workflow**, **improving accuracy by 20% and throughput by 15%** – a direct end-user quality/speed fix that drove a system-wide rollout.
- Improved product adoption and stakeholder enablement by **conducting onboarding workshops** for internal teams and enterprise customers.

Data Analytics Summer Intern

Atlas Copco Group

📅 04/2023 - 06/2023 📍 Pune, India

- **Developed and implemented** a system to measure training effectiveness based on the Kirkpatrick model.
- Collaborated with the L&D division to **analyze the training programs**.
- Successfully **designed Power BI dashboards** for stakeholders to access and interpret live training data.
- **Identified KPIs** for three levels of the Kirkpatrick Model for measuring training effectiveness.

CERTIFICATIONS

Power BI Essential Training

Mastered Power BI essentials for data insights and data visualization

Six Sigma Green Belt

Studied Lean tools and Quality Control tools to analyze and improve the operations process

EDUCATION

Master of Business Administration (MBA)
- Strategy & Marketing

Indian Institute of Management Nagpur

📅 07/2022 - 05/2024 📍 Nagpur, India

B.Tech - ECE

Vellore Institute of Technology

📅 04/2016 - 12/2020 📍 Vellore, India

KEY ACHIEVEMENTS

Enterprise Delivery Workflow Transformation (2026)

Led cross-functional migration of a strategic client delivery workflow, **enabling advanced streaming formats** (4K, HDR, Dolby Vision/Atmos) while **reducing publishing TAT by 15%**.

Improved GenAI subtitles (2025)

Scaled GenAI-powered subtitle workflows for regional content, **improving subtitle accuracy by 20%** and **increasing daily processing throughput by 15%**.

National Finalist (Top 10/3,000+) – IDFC FIRST Bank FAME 3.0 (2024)

For innovative highway safety solution design. Achieved the **national finalist** in the IDFC fame 3.0 case competition which is **top 10 among 3000 applicants**, for brilliance in solutions to make Indian highways safer.

ML Research Paper (2020)

Achieved **98% accuracy** in differentiating between normal and cystic ovaries using ML algorithms for a **research paper accepted into IJITEE journal**
